EXPERIENCE

Data Engineering Internship – EduSkills Foundation

Worked on real-world projects involving the development and optimization of scalable data pipelines for ETL (Extract, Transform, Load) processes. Leveraged SQL and Python for data processing, cleaning, and analysis to support data-driven decision-making. Designed efficient database schemas using data modeling techniques to meet project requirements. Collaborated with a team to solve industry-relevant challenges and presented actionable insights through data

100X DEVS – FULL STACK DEVELOPMENT-COHORT

Pune | India

2023-2024

Successfully completed the 100xDevs Full Stack Developer Program, gaining hands-on experience in building scalable web applications. Collaborated on real-world projects, enhancing problem-solving and team collaboration skills

WEB DEVELOPMENT INTERNSHIP - ACMEGRADE

Pune | India

Apr 23 – May-23

Learned Basics of development and dynamic programming

PROJECTS

Wallet – Payment Made Simple

Developed a full-stack payment application with features like user authentication, balance checks, fund transfers, and transaction history using Next.js, Node.js, Prisma ORM, PostgreSQL, and TurboRepo for MonoRepo management.

[Github](#)

Nuro-Discord Bot

Developed Neural-Nexus, an extensible conversational bot capable of answering questions, performing calculations, and accessing online information using LangChain, Python, SQL (Postgres), and Pycord for Discord integration, with Alembic for database migrations.

[Github](#)

Medium-Blogging platform

Built a responsive Medium-inspired blog platform with user authentication, profile management, rich text blog creation, and data validation using React, Tailwind CSS, Node.js, Prisma, PostgreSQL, Zod, and Hono.

[Github](#).

EthWallet - Ethereum & Solana HD Wallet Generator

Developed a tool for generating and managing Ethereum and Solana HD wallets from a mnemonic phrase using Web3 concepts and JavaScript for secure wallet creation and management.
