WORK EXPERIENCE

Trainee, *StratVeda Technologies Pvt Ltd* 08/2025 – 11/2025
Pune Maharashtra India

- Deployed and managed backend APIs on **Linux-based AWS infrastructure**, ensuring high availability and reliability
- Configured **Nginx reverse proxy and load balancing**, improving request handling efficiency and reducing latency under traffic load
- Built **monitoring dashboards using Prometheus & Grafana**, tracking system metrics (latency, uptime, error rates) for proactive issue detection
- Implemented **secure authentication and API validation**, strengthening service security and reducing vulnerabilities
- Performed **log analysis and troubleshooting**, identifying bottlenecks and improving system stability

SDE Intern, *Skylark Labs* 07/2025 – 08/2025
Pune Maharashtra India

- Integrated AI services into production systems using **Python and FastAPI microservices**.
- Built real-time streaming services using **WebRTC for low-latency communication systems**.
- Deployed and maintained services on **Linux cloud environments**.
- Troubleshot streaming and network issues using **HTTP diagnostics, logs, and system monitoring tools**.

EDUCATION

Bachelor of Engineering - Information Technology, 2022 – 2026
International Institute of Information Technology Pune Maharashtra India

- Attained a GPA of 8.05, showcasing exceptional academic performance and a robust grasp of India Information Technology principles.

SKILLS

Cloud & Infrastructure
- **AWS (EC2, VPC, ALB, ECS, EKS, S3, Lambda, CloudFront, CloudWatch), GCP, Azure**

Linux & Systems
- **Linux/Unix, Bash Scripting, System Monitoring, Log Analysis**

Programming
- **JavaScript,TypeScript,python**

Containers & Orchestration
- **Docker, Kubernetes (Pods, Deployments, Services, Autoscaling, ConfigMaps, Secrets), Helm**

Monitoring & Observability
- **Prometheus(metrics scraping, exporters), Grafana(dashboarding, alerting),New Relic (APM, distributed tracing, performance monitoring),SLI, SLO, SLA**

CI/CD & Automation
- **GitHub Actions, Deployment Pipelines**

PROJECTS

AWS Auto Scaling + Load Balancer (High Availability System),
AWS EC2, Auto Scaling Group (ASG), Application Load Balancer (ALB), CloudWatch
- Designed and deployed **Auto Scaling Group (ASG)** with EC2 behind **Application Load Balancer (ALB)**
- Implemented **dynamic scaling policies using CloudWatch alarms**, enabling automatic scaling based on CPU load
- Improved system **fault tolerance and availability under varying traffic conditions**

Containerized Microservices Deployment, *Docker, Nginx, Linux, AWS EC2*
- Deployed microservices using **Docker containers on AWS EC2**
- Configured **Nginx reverse proxy** for efficient routing and load distribution
- Monitored logs and system processes to **maintain uptime and service reliability**

Monitoring with Prometheus & Grafana, *Prometheus, Grafana, Linux,docker*
- Implemented **metrics collection and visualization system** for infrastructure and applications
- Built dashboards for **CPU, memory, latency, and service performance tracking**
- Configured **alerting mechanisms**, reducing incident response time and improving reliability

AWS ECS + CI/CD Pipeline Deployment, *AWS ECS (Fargate), ECR, Docker, GitHub Actions, CloudWatch*
- Built and deployed containerized applications using **Docker + AWS ECS (Fargate)**
- Pushed images to **AWS ECR** and automated deployment using **GitHub Actions**
- Integrated **CloudWatch logging and monitoring** for production visibility

CERTIFICATIONS

- AWS Academy Graduate - Cloud Foundations
- Devops Cohort Certification
