WORK EXPERIENCE

Trainee, *StratVeda Technologies Pvt Ltd* 08/2025 – 11/2025
Pune Maharashtra India

- Built and deployed scalable backend APIs on **Linux**-based **AWS infrastructure**, achieving high availability and **reducing time-to-market by 70%.**
- Optimized traffic handling using **Nginx reverse proxy and load balancing,** significantly **lowering latency under load.**
- Implemented end-to-end **monitoring with Prometheus and Grafana,** enabling **real-time tracking of latency, uptime, and error rates for proactive issue resolution.**

SDE Intern, *Skylark Labs* 07/2025 – 08/2025
Pune Maharashtra India

- Integrated AI services into production systems using **Python and FastAPI microservices**, improving system **capability and reducing development overhead**
- Built real-time streaming services using **WebRTC for low-latency communication systems**.
- **Deployed** and **maintained** applications on **Linux-based cloud environments,** ensuring **reliability and performance.**

EDUCATION

Bachelor of Engineering - Information Technology, 2022 – 2026
International Institute of Information Technology Pune Maharashtra India

- Attained a GPA of 8.05, showcasing exceptional academic performance and a robust grasp of India Information Technology principles.

SKILLS

Cloud & Infrastructure
- **AWS (EC2, VPC, ALB, ECS, EKS,ECR, S3, Lambda, CloudFront, IAM,CloudWatch), GCP,Terraform,ArgoCD**

Linux & Systems
- **Linux/Unix, Bash Scripting, System Monitoring, Log Analysis,**

Programming
- **JavaScript,TypeScript,python**

Containers & Orchestration
- **Docker, Kubernetes (Pods, Deployments, Services, Autoscaling, ConfigMaps, Secrets), Helm**

Monitoring & Observability
- **Prometheus(metrics scraping, exporters), Grafana(dashboarding, alerting),New Relic (APM, distributed tracing, performance monitoring),SLI, SLO, SLA**

CI/CD & Automation
- **GitHub Actions, Deployment Pipelines**

PROJECTS

Scalable Backend Deployment on AWS EKS with ALB Ingress,
AWS EKS • Kubernetes • Docker • ALB Ingress • Load Balancing • Linux • Networking • High Availability
- **Deployed scalable backend services on Kubernetes (EKS) using Deployments, Services, and Ingress, achieving high availability with 5 replicas.**
- **Integrated AWS ALB Ingress Controller for external traffic routing,** enabling **secure and efficient load balancing.**
- **Containerized applications using Docker** and managed deployments in a cloud-native environment**.**

AWS Infrastructure Provisioning using Terraform,
Terraform • AWS (VPC, EC2, S3, ALB) • Infrastructure as Code • Networking • Load Balancing • High Availability
- **Provisioned AWS infrastructure using Terraform (VPC, subnets, Internet Gateway, routing) ensuring a scalable and secure network setup.**
- **Deployed EC2 instances** across multiple availability zones with **Application Load Balancer (ALB)** for **high availability and traffic distribution.**
- **Automated infrastructure** using **IaC** with **integrated security groups and S3 storage,** improving deployment efficiency and reliability.

AWS Auto Scaling + Load Balancer (High Availability System),
AWS EC2, Auto Scaling Group (ASG), Application Load Balancer (ALB), CloudWatch
- Designed and deployed **Auto Scaling Group (ASG)** with EC2 behind **Application Load Balancer (ALB)**
- Implemented **dynamic scaling policies using CloudWatch alarms**, enabling automatic scaling based on CPU load
- Improved system **fault tolerance and availability under varying traffic conditions**

Monitoring with Prometheus & Grafana, *Prometheus, Grafana, Linux,docker*
- Implemented **metrics collection and visualization system** for infrastructure and applications
- Built dashboards for **CPU, memory, latency, and service performance tracking**
- Configured **alerting mechanisms**, reducing incident response time and improving reliability

CERTIFICATIONS

- AWS Academy Graduate - Cloud Foundations
- Devops Cohort Certification
